Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Tuesday 06 Jul 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Becoming brighter on Wednesday, with sunshine and showers.

Today:
The odd clear spell at first but for most a cloudy start, with patchy rain. Progressively brightening up to sunny spells and showers, with some of these showers potentially heavy, with isolated thunder possible later. Maximum temperature 21 deg C (70 deg F).

Tonight:
Showers tending to die away through the evening with cloud thinning and clear spells developing after midnight. This will allow the odd mist or fog patch to form before dawn. Minimum temperature 8 deg C (46 deg F).

Thursday:
Clear spells at first with short-lived mist and fog patches. Scattered showers developing, not as heavy or widespread as Wednesday, parts of the west may stay dry. Maximum temperature 21 deg C (70 deg F).

Outlook for Friday to Sunday:
Changeable, with further sunny spells but also showers. Low cloud perhaps arriving into Saturday, breaking later to allow heavy, perhaps thundery showers. Temperatures mostly near normal, with generally light winds.
